

I CLAIM:

1. A gelatinous cushion comprising:
a base made of foamable material,
a cushioning member attached onto said base, and made of
5 gelatinous material for cushioning purposes, and including an outer
peripheral surface formed thereon, and including a plurality of
orifices formed therein for cushioning purposes, and
an outer covering film applied onto said outer peripheral
surface of said cushioning member, to cover said cushioning
10 member, and to form a smooth outer surface for said cushioning
member.
2. The gelatinous cushion as claimed in claim 1, wherein said
base includes a plurality of perforations formed therein.
3. The gelatinous cushion as claimed in claim 1, wherein said
15 cushioning member includes a plurality of inner peripheral surfaces
formed therein, to define said orifices of said cushioning member
respectively.
4. The gelatinous cushion as claimed in claim 3, wherein said
outer covering film is applied onto said inner peripheral surfaces of
20 said cushioning member.
